

# Customs Management

Accelerate the **speed, accuracy, and transparency** of global customs and compliance

## OVERVIEW

Blujay's Customs Management is a multi-country, multi-language customs compliance software solution that enables you to comply with customs and security regulations through a single point of connection.

## SOLUTIONS AT A GLANCE

- › Automates customs and compliance processes
- › Consolidates customs operations into a central hub
- › Provides a common user interface
- › Standalone UI or direct connection with any ERP system
- › Complete, real-time visibility of declaration status to any party, internal or external
- › Interfaces directly with operational systems
- › Management of customer-specific rules with visualization of the handling process
- › Access to on-demand or scheduled reporting and data extraction
- › Regulatory externally proven and certified providing low-risk solution
- › Multi-tenant and multi-language capable cloud-based system

## KEY FEATURES

- › Handles technical & administrative issues associated with connecting to customs authorities & local application partners around the world
- › Customs validations and edits to ensure only compliant declarations are sent to customs
- › Fully scalable to cope with fluctuating volumes of business, either overall or within a particular country
- › Streamlines communication between the whole import/export community, enabling information to be shared automatically, delivering supply chain benefits
- › Direct connectivity to key countries in every region around the world with new countries added regularly
- › Uses customer standard EDI output to upload to required customs regimes
- › Harmonization of a single customs regime in multiple countries to a single output
- › Supports both ends of the supply chain - logistics service providers as well as to the actual Importer/Exporter - independent of industry
- › Ability to automatically provide status information throughout the life-cycle of the customs declaration
- › Configurable workflow by customer requirements with the ability to file customs declarations cost effectively while using built in automation tools

## SOLUTION

Blujay Solutions' Customs Management provides a dramatic reduction in cost, time, and complexity by bringing global customs operations together into a single user interface. Customs Management includes services for the legally compliant handling of goods and services from a central point with all major global customs and security standards including: entry of goods, release for free circulation within a country or region, exit, export and special procedures (storage or specific use). Declarations are filed and notifications from customs authorities are received electronically using a single solution in the same format regardless of destination.

Automated declaration filing to customs is enabled when the complete data is received from an external ERP or Transportation Management system. User interface automation tools are available to speed up the process of data entry for item master and other templates, while the built-in conversion engine transforms data in and out of the Blujay standard format.

Ideal for logistics service providers, forwarders, customs brokers, and global manufacturers, Customs Management is designed to handle your unique customs compliance requirements for imports/exports to/from multiple countries now and in the future. A key element of our approach is that the customs application is constantly maintained and developed by specialists who have a close relationship with customs bodies in their own location. They understand local requirements and have the experience of making guidelines and regulations work effectively in practical everyday situations.

## ABOUT BLUJAY SOLUTIONS

Blujay Solutions delivers supply chain software and services to the world's most progressive retailers, distributors, freight forwarders, manufacturers, and logistics service providers. Transforming supply chain logistics with the Blujay Global Trade Network, we enable customers to unlock the power of more than 40,000 universally connected partners. With Blujay, companies can achieve greater trade velocity, transform their supply chain economics for disruptive advantage, and see beyond the horizon to optimize their future in the global economy.
